PROFESSIONAL SUMMARY

Results-driven Full-Stack and Mobile Software Developer with 7+ years of experience designing and shipping scalable web and mobile products across fintech, edtech, healthcare, real estate, transport, media, and e-commerce. Founder of EduPro Solution, an AI-powered school and polytechnic management platform and coding academy serving institutions across Nigeria. Experienced in end-to-end product ownership, system design (rate limiting, idempotency, and API reliability patterns), and AI integration, with a track record of delivering production-ready applications for clients across Nigeria, the United Kingdom, and the United States. Proficient in the MERN stack, React Native, Next.js, NestJS, and Electron.js, with hands-on experience leading cross-functional teams and managing multiple concurrent client engagements.

TECHNICAL SKILLS

Languages & Frameworks: JavaScript, TypeScript, React.js, Next.js, React Native, Node.js, Express, NestJS, Electron.js, Ionic

Data & Backend: MongoDB, PostgreSQL, SQL, TypeORM, Redux / Context API, Socket.io

System Design: REST API architecture, rate limiting, idempotency, role-based access control, multi-tenant systems

AI & Integrations: OpenAI / DALL-E, Stripe, Paystack, PayPal, Klarna, SendGrid

Platforms & Tools: AWS, Vercel, Docker (basic), Git / GitHub, Jira / Trello, Android Studio / Xcode, Agile / Scrum

PROFESSIONAL EXPERIENCE

Full-Stack & Mobile Developer | Cyclebreeze

January 2026 – Present

Ogbomoshos, Oyo State

- Collaborate with multiple cross-functional developer teams across diverse, concurrent product lines.
- Built a full-featured university mobile application from design through deployment.
- Developed a digital publications platform for academic and institutional content management.
- Engineered a medical laboratory management system handling patient records, test results, and reporting.
- Contributed to the Circue travel booking platform — new pages, an event scheduling calendar, and NestJS API endpoints.

Mobile & Desktop App Developer (Contract) | EdSofta Engineering

2025 – Present

Remote

- Engaged since 2025, owning end-to-end development of the company's full mobile application and companion desktop application.
- Built a comprehensive education mobile app covering CBT exam practice (JAMB, WAEC, NECO), payment screens, study materials, and AI-powered study features.
- Developed 100+ screens in React Native, delivering a feature-rich learning experience for students.
- Built the cross-platform desktop companion app with Electron.js, shipping production Windows (.exe) and macOS (.dmg) builds.

Founder / Lead Software Engineer | EduPro Solution (Founder & CTO)

2022 – Present

Lagos, Nigeria

- Founded and built an AI-powered school management platform (edupro.com.ng) serving multiple Nigerian schools, with online exams, AI-generated report cards, attendance tracking, lesson notes, and student portals.
- Applied system design practices to strengthen platform reliability, including rate limiting and idempotency on core APIs to prevent duplicate transactions and abuse under load.
- Deployed and managed multi-school subdomains, enabling different institutions to operate independently on the same platform.

- Founded the EduPro Solution Academy (2025), training students in web development, mobile app development, and software engineering; graduated a cohort of 20 students in Web Development and Robotics (April – September 2026).
- Expanded EduPro Solution into the tertiary education sector (August 2026), onboarding British Transatlantic Polytechnic onto the platform for e-learning and institutional e-management.
- Stack: MERN (MongoDB, Express, React, Node.js), AI integrations, SQL.

Full-Stack Developer (Contract) | Lanbeth Resolutions Home Care

2026

United Kingdom (Remote)

- Built the backend from scratch (Node.js, MongoDB) for LanbethCare, a homecare management platform for a UK-based care provider.
- Designed a role-based system spanning Staff, Client, Admin, and Policy roles, with a ~40-endpoint API covering clients, reports, staff, policy, and audit logging.
- Delivered dedicated dashboards for staff, clients, and administrators to manage care delivery and compliance.

Full-Stack Developer (Contract) | National Daily Newspaper

July 2026

Remote

- Built a full blog and newspaper platform for digital news publishing, from content management to public-facing delivery.

Full-Stack Developer (Contract) | Phebe Consultancy

July 2026

Remote

- Built a travel consultancy website to showcase services and manage client-facing travel content.

Full-Stack Mobile Developer (Contract) | Praix Development

April 2025 – August 2025

Remote

- Built Finomic AI, an AI-powered financial assistant and trading platform, using Next.js, Node.js, and OpenAI integration.
- Developed Loaded Ride, an Uber-like transport mobile app in React Native, shipping Android (.apk) and iOS builds.

Full-Stack Developer (Contract) | Skillovia

January 2025 – March 2025

United Kingdom (Remote)

- Built a skill-barter exchange platform enabling users to swap skills and discover nearby matches via geolocation.
- Designed and implemented RESTful API endpoints, a token-based reward system, and geolocation search functionality.

Full-Stack Web Developer (Contract) | Life Mirror

2024

United States (Remote)

- Built the full Life Mirror platform, a Christian discipleship app featuring the Bible, curated video content, and spiritual growth resources, using the MERN stack.
- Developed Dream Simu, a vision-board sub-module integrated with DALL-E (OpenAI) enabling users to visualise themselves in their dream careers and goals.
- Delivered both the main application and a complete admin dashboard.

Software Developer (Contract) | Rayofaa

2024

United States (Remote)

- Built a full e-commerce platform for an African print-wear clothing brand, covering product listings, store creation, and an admin panel.
- Integrated multiple payment gateways — Stripe, PayPal, and Klarna — using the MERN stack.

Software Developer (Contract) | Clarion Global Oil & Gas Limited

2024

Nigeria

- Designed and developed the corporate website for an oil and gas firm (safeoilandgas.com.ng), with a responsive React.js UI and a Node.js admin dashboard.

Full-Stack Developer (Freelance) | Food E-commerce Platform

2024

Remote

- Developed a full food e-commerce website featuring product listings, cart, order management, and payment integration.

- Extended a car-parking mobile app (live on the Play Store and App Store) serving Nigeria and Senegal, built with Ionic.
- Built additional NestJS + TypeORM API endpoints and multi-role dashboards for drivers, admins, and attendants.
- Managed project coordination via Trello and Slack, serving as project manager for one engagement.

ADDITIONAL CONTRACT ENGAGEMENTS (2022 – 2023)

- **OGAPOS Nigeria Limited (ogapos.com)** — financial transaction management system covering sales, purchases, delivery, cash flow, and staff fund disbursement — REST APIs, SQL, React frontend.
- **Kubique Accounting Software** — financial accounting platform for statement preparation and reporting — Redux/Context state management, SendGrid SMTP integration.
- **Icone Bid Nigeria Limited (kobobid.com)** — enhanced an online auction and gaming platform with Liquid.js templating and Socket.io real-time bidding.
- **Cyclebreeze** — built LifeSaver, a savings, investment, and bill-payment app, with React Native and Redux.
- **The Miracle Motors** — added features and deployed the React Native app for an inter-state travel booking platform; extended the Node.js backend.
- **Lands and Creation Limited** — built 21Let, a shortlet real estate platform, using the MERN stack with Context API.
- **Talentiverse (talentiverse.com)** — built a CV/resume preparation SaaS platform on the MERN stack with SendGrid email integration.
- **Hybrid Homes and Properties (hybridhomesandproperties.com.ng)** — built a real estate listing platform for realtors on the MERN stack.
- **Adzenon, United Kingdom (adzenon.com)** — built a digital marketing agency website — React.js frontend and Node.js admin dashboard (engagement ongoing).

EDUCATION

B.Sc. Physics with Electronics | Osun State University, Osogbo, Nigeria

2016 – 2020

WAEC (O'Level) | Heavenly Love High School, Lagos, Nigeria

2009 – 2015

CERTIFICATIONS & TRAINING

- Web Design & Development — Femish IT Solutions & System Ltd, Lagos
- Software Development — Femish IT Solutions & System Ltd, Lagos
- NYSC Certificate (2022) — Completed national service, Saki East LGA, Oyo State
